Our editors independently research, test, and recommend the best products; You can learn more about our review process here. We can receive commissions on purchases made from our chosen links. Alistair Berg/Getty Images Our Top Choice Best Canvas Preparation: Canvas Stretching & Canvas Priming from Hunter College Lanfranco guides you through the materials you need to get set up, including a ruler, scissors, and stretcher or strainer bars. Best acrylic technique: Will Kemp Art School Along with a variety of videos on the right color mixing, Will will also put you up with a variety of painting tutorials. Best Watercolor for Beginners: Beginners Watercolors on Udemy Created by Nicola A. Blakemore, the course includes four hours of on-demand video, and you can even access the course material on your TV. Best Story: In the Studio: Postwar Abstract painting from the Museum of Modern Art (MoMA) You will be assigned readings to provide context to the larger cultural, intellectual and historical events that shaped these artists. Best oil painting: Oil painting for beginners of Florent Farges ArtsS according to his channel follows Farge's teachings to the 19th-century studio method. Best Paint Mixing: Color Theory & Mixing by Jeanette Jobson This is a crash course in the nuance of the process that is sure to set you up for success. Best introduction to Gouache: Gouache 101 by Minnie Small This tutorial explores not only what it is and how to use it, but also which brushes and paper best fit the medium. Before embarking on a new painting project, the first step is to prepare the canvas correctly. Instructor Katerina Lanfranco, who teaches painting at Hunter College in New York City, has uploaded two free videos to her YouTube channel (which covers Canvas Stretching and Canvas Priming) to set the foundation for your painting. Both guides are really about the best practices for producing an effective canvas. Lanfranco guides you through the materials you need to get set up, including a ruler, scissors and stretcher or sieve bars, and clearly walks you through the process of cutting the canvas and attaching it to bars. Priming comes next: using gesso will create a flexible surface that receives paint well and allows you to spread it more efficiently. Lanfranco outlines the materials for the process, including gesso, a gesso brush and sandpaper (to grind down the surface after each layer, so that the canvas is smooth and ready for painting) – and takes you through step by step with simple instructions. At the end of the course, you will have a canvas ready to paint. Interested in trying out or working to refine acrylic painting skills? On his YouTube channel, artist Will Kemp writes and makes his own videos about classic painting techniques, with a concentration on the use of acrylic paint. Whether you have just started or have a more ambitious project in mind, Will's videos a variety of strategies for the medium. Get started with simple basic building blocks, including proper cleaning of the acrylic paint brush, choice of acrylic paint, application of acrylic-coloured grounds and basic colour mixing. Along with a series of videos about the right color mixing, Will will also set you up with a variety of painting tutorials- ranging from a beginner to a more advanced skill set. Learn the basics of painting a still life with the multi-part beginners Acrylic Still Life Techniques, gain knowledge of light and shade techniques, and try your hand at acrylic landscape painting, palette knife techniques, portraits, painting sky, floral still life, and even painting in the style of Claude Monet. And the best: Everything is free. Watercolors have a reputation for being a difficult painting discipline. This Beginners Watercolor course at Udemy will build confidence for new painters, giving you the tools to master the basics and leading with a playful approach to the medium. All you need to get started is a box of watercolor paint, a round brush, watercolor paper, a black ink or felt pen, pencil, eraser, a clear or white wax candle or crayon, and two jars for water. The course (around \$100) is made by Nicola A. Blakemore and includes four hours of on-demand video, and you can even access the course material on your TV or mobile phone. The goal of class is simple – to teach you how watercolor paint works with water and how to utilize it efficiently. Blakemore's class will walk you through understanding the principle of a color wash, how the same colors can create shape and shading, how to create highlights and shadows with watercolors, and how to color mix your paint. Founded in 1929, The Museum of Modern Art (MoMA) is home to some of the most famous modern paintings in the world. While visitors have lined up to see Vincent Van Gogh's The Starry Night or masterpieces from Jackson Pollock and Willem de Kooning, the museum now has online programming you can access at home. Although MoMA offers a number of free online courses exploring a variety of artistic disciplines, In the Studio: Postwar Abstract Painting focuses on the materials, techniques and conceptual processes of seven New York School artists: de Kooning, Pollock, Yayoi Kusama, Agnes Martin, Barnett Newman, Ad Reinhardt and Rothko. The favorite course is set up so you can work at your own pace and on your own schedule. Your teacher will guide you through demonstrations in studio and gallery reviews, and will assign readings to provide context to the larger cultural, intellectual and historical events that shaped these artists after World War II. The class also includes a number of optional studio exercises, for which you need art supplies. These will hopefully provide inspiration for your own abstract paintings. Interested in making a step into the style that created Leonardo da Vinci's Mona Lisa and Picasso's Les Femmes d'Alger? Oil painting uses pigments with drying oils as a binder, such as flaxseed or poppy oil. If you're a beginner, French artist Florent Farges has a series of video tutorials on his YouTube channel that will help you get the ball rolling with your oil painting instruction. Farges follows the doctrine of the 19th-century studio method. The best place to start is Oil Painting for beginners, which is free. Here Florent strives for simplicity. All the questions you might think, such as Why use oil paint?, Is oil paint more complicated?, and Is oil paint more toxic? is addressed here, as well as a step-by-step painting demonstration. When you get comfortable with the basics, there are many more tutorials you can choose from, including specific videos about oil painting drying time, pigments and palettes, setting up for plein air painting, and of course-tips for up the oil painting game. Understanding color theory is a critical skill for any artist. Not only does it explain the relationship between colors, but it is also the key to understanding their combinations. When it comes to paint, color theory and paint mixing go hand in hand. While there is a large amount of scholarship available on the theme of color theory itself (see Josef Albers's basic Interaction of Color), getting hands-on with your paint in your home studio will also open your eyes to how it works on the canvas. Jeanette Jobson's free Color Theory & Mixing - The Basics video is a great introduction to mixing, using a shared primary palette. This palette uses two shades of each primary color (red, yellow and blue) – with one warm and one cool shade. Jobson clearly explains many of the concepts related to color and mixing – including color bias. She guides you through what it means and how each shadow of paint illustrates it – with a selection of hues in the palette. Jobson then begins his mixed demonstration: a crash course in the nuance of the process that will surely set you up for success. Gouache is a water-based medium with a heavier pigment load than watercolor, and is thus designed to be more opaque. In this video, artist Minnie Small breaks down the basics of gouache. This tutorial explores not only what it is and how to use it, but also which brushes and paper best fit the medium. As Small explains in the free video, many of the tools you want to use for watercolor, such as the type of brush, will also work for gouache. Minnie illustrates the varying density of the paint, as well as its range of beneficial properties- including velvet matte finish, quick drying time, and the fact that it can be reactivated with water after drying. So, if you want to continue working on part of a finished painting, you can easily process it. Depending on the discipline you begin with, online classes can learn a variety of painting techniques. The classes we chose touch different areas of the medium. They include stretching and priming a canvas from scratch; understand color theory and mix paint colors; learn the basis of watercolor painting; and mastery how to work with acrylic, oil and gouache paint. All these are skills that will build your painting practice. All classes on this list - with the exception of one: Beginners Watercolors on Udemy, which costs around \$100 - are available for free. The materials you need for your online painting class depend on the type of painting you are going to study. But to get started you need brushes, painting of your choice, a form of paint palette, a chickenpox, and a suitable surface for using paint (e.g. a canvas, watercolor paper, or bristol table). If you take In the Studio: Postward Abstract Painting history course from the Museum of Modern Art, all you need is your computer. In an online painting class, heaven is the limit of what you can make. With the canvas preparation training guides from Hunter College, you'll be able to create your own prepped and primed canvas surface to paint on. In the classes from Will Kemp Art School, you use acrylic to create landscapes, portrait paintings and still works. And with Florent Farges Art's oil painting tutorials, you will be able to create your own plein air painting. Painting.
